1. Introduction

The Student Experiential Learning Fund (SELF) enables learning opportunities outside the classroom for the clubs and teams of the Schulich School of Engineering (SSE). The Schulich School of Engineering aims to allocate at least \$120,000 annually through SELF to improve the Experiential Learning of the Engineering Student. Funds are normally allocated each fiscal year.

Experiential Learning (EL) is learning-by-doing that bridges knowledge and experience through critical reflection. Using intentionally designed and assessed activities, EL enables students to increase understanding, challenge and advance perspectives, clarify values, develop and hone their skills and promote new ways of thinking and doing. These opportunities prepare students to lead and/or respond to change and thrive in an increasingly complex world.

As part of the SELF program budget, the Schulich School of Engineering aims to allocate \$60,000 CAD per fiscal year (April 1 – March 31) to the Engineering Students' Society (ESS) to be used for their events and services within that year. These funds will either be made available to reimburse expenses or may be held in a University account.

As part of the SELF program budget, the Schulich School of Engineering aims to allocate approximately \$7,500 CAD per fiscal year (April 1 – March 31) to Engineering Departmental Student Societies and Engineering Minor Student Societies that are recognized by the Engineering Students' Society. These funds will be used for their events and services within that year and will either be made available to reimburse expenses or may be held in a University account. The exact allocation between societies will be determined by the Dean in consultation with the ESS President each year.

Commented [DY1]: Will advise with Ella

Use of funds allocated to ESS/Department Student Societies/Engineering Minor Student Societies need to follow all funding rules in this document and all University of Calgary financial policies.

The remainder of the SELF funds in that fiscal year will be divided over the 8 funding competitions and allocated to all the Schulich Clubs and Teams that are successful during the SELF application process.

2. Policy Updates

Any updates or changes to this policy must be approved by the Schulich School of Engineering Dean. Input should be sought from the Committee. Normally updates to the document will be considered between March 15th and April 15th.

3. Source of Funding

Funding for SELF will be provided by the Schulich School of Engineering's Dean's Office. When possible, external donations will be sought to support the funding of SELF.

4. Club/Team Eligibility Regulations

Clubs and Teams who conform to the following regulations will be considered eligible to apply for, receive, and use funding from SELF:

- The majority of members must be registered in an undergraduate or graduate program in the Schulich School of Engineering at the time of application
- All members must be continuing with their undergraduate or graduate studies at the University of Calgary following the completion of the funded activity
- *Clubs may be asked to register as a Students' Union (SU) Club if deemed necessary by the Committee*

5. Types of Activities

Category A: Mental Health Events

For Clubs and Teams that are holding events for the engineering students focused on Mental Health.

Category B: EDI, Indigenous, & Sustainability Initiatives

For Clubs and Teams that have Equity, Diversity, Inclusion (EDI), Indigenous, and/or Sustainability initiatives geared towards the engineering students.

Category C: Learning Support

For Clubs and Teams that want to offer learning support to the engineering students.

Category D: Engineering Design

For all engineering-focused competition teams that require funds for research and testing their team designs. *Note: Schulich Competition Teams need to provide the contact information of Faculty Advisor or Technical Advisor to apply under this category.*

Category E: Professional Development Projects

For Clubs and Teams that have Professional Development projects geared towards engineering students. These projects are meant to improve and expand upon the opportunities for students in pursuit of their career goals.

Category F: Club/Team Operations

For Schulich Club and/or Team Operations that will support their efforts to provide events/services to the engineering students. The following is the acceptable criteria:

- Insurance (i.e. Medical, Travel)
- Sanitary Equipment
- Office Supplies
- Training Courses
- Room Bookings
- AV Rental

Additional items that do not fall under the criteria above will be assessed and approved at the Committee's discretion.

Category G: Other

For all other activities that do not fall under the categories that are listed above. This includes: Schulich Clubs and Teams that are looking at hosting a small-scale event for engineering students. *Note: Clubs/Teams need to get approval from the Dean or their designate prior to applying under this category.*

6. Funding Regulations

6.1 General Policies and Guidelines

- SELF Funding is a competitive process and clubs and teams should submit high quality, complete applications. Submission of an application does not guarantee funding.
- A collaboration between multiple clubs/teams who apply for funding for the same activity should submit a group application.
- If a series of individual applications are submitted for the same activity, the SELF committee may choose to collectively view these individual applications as a single group application.
- All other potential and secured sources of funding must be disclosed in SELF applications. The total amount of secured funding cannot exceed the total budget for the activity under consideration.
- In Club/Team activities where some participants are not eligible for SELF, any approved funding will be prorated to include only those who are eligible.
- SELF applications are normally submitted for planned activities where the activity start date has not yet occurred by the time of application submission. Any applications retrospectively seeking funding for activities that have already occurred (where the start date has already passed) may only be accepted at the discretion of the Committee and approval from the Dean or designate.
- Typically SELF funds will be distributed through a reimbursement process instead of an upfront payment. Proper receipts and documentation is required to receive reimbursement.
- SELF funding may be refused if proper receipts and documentation is not provided to support the Club/Team reimbursement submissions. Resubmission of receipts and documentation may be accepted at the discretion of the SELF Administrator.
- SELF will allocate funding based on the maximums specified in Table 1. All fundings will be distributed until the funds allotted for the fiscal year are fully disbursed.

Table 1: Funding Maximums per Category

Category	Maximum Funding
Category A: Mental Health Events	Clubs/Teams may apply for multiple activities under this category within one fiscal year, with SELF subsidizing <u>each activity</u> up to a maximum of \$400 CAD.*
Category B: EDI, Indigenous, & Sustainability Initiatives	Clubs/Teams may apply for multiple activities under this category within one fiscal year, with SELF subsidizing <u>each activity</u> up to a maximum of \$400 CAD.
Category C: Learning Support	Clubs/Teams may apply for multiple activities under this category within one fiscal year, with SELF subsidizing <u>each activity</u> up to a maximum of \$400 CAD.
Category D: Engineering Design	Clubs/Teams may apply for multiple activities under this category within one fiscal year, with SELF subsidizing up to a maximum of \$500 CAD in total for that year.
Category E: Professional Development Projects	Clubs/Teams may apply for multiple activities under this category within one fiscal year, with SELF subsidizing <u>each activity</u> up to a maximum of \$400 CAD.
Category F: Club/Team Operations	Clubs/Teams may apply for multiple activities under this category within one fiscal year, with SELF subsidizing up to a maximum of \$200 CAD in total for that year.*
Category G: Other	Clubs/Teams may apply for multiple activities under this category within one fiscal year, with SELF subsidizing <u>each activity</u> up to a maximum of \$300 CAD.

*Category A and Category F have exceptions to maximum funding detailed in Sections 10 and 15, respectively.

6.2 Funding Exclusions

Examples of activities that SELF will not fund:

- Any aspects of internship placement
- Any activity where students receive academic credit
- Events or Activities during the school year that result in students being absent from classes for more than three days.
- Any activities that do not provide a service to the Schulich Engineering students.
- Any activity or event that qualifies for SSAF (Schulich Student Activities Fund).
- Any activity where SELF funds will be used to purposely make a profit (Fundraising Events).
- Alcohol or Drugs or events that include Alcohol unless approval is granted by the Dean.
- Activities that pose unnecessary risks (i.e. skydiving, fire hazards, etc.) *The SELF Committee may request for a Campus Risk Assessment to be completed for the activity*

7. Application Deadlines

The Evaluation committee meets 8 times each fiscal year to evaluate applications and distribute funds. Application deadlines are based on the funding competitions as listed in Table 2. Note that these deadlines are enforced. Therefore, to ensure applications are complete and of high quality, students are encouraged to work on their applications well ahead of the deadlines outlined in Table 2.

Table 2: Application Deadlines

Funding Competition	Application Deadline	Committee Meeting
Funding Competition #1	11:59 pm, July 31	First Week of August
Funding Competition #2	11:59 pm, August 31	First Week of September
Funding Competition #3	11:59 pm, September 30	First Week of October
Funding Competition #4	11:59 pm, October 31	First Week of November
Funding Competition #5	11:59 pm, November 30	First Week of December
Funding Competition #6	11:59 pm, December 31	First Week of January
Funding Competition #7	11:59 pm, January 31	First Week of February
Funding Competition #8	11:59 pm, February 28/29	First Week of March
Funding Competition #9	11:59 pm, March 31	First Week of April

Funding Competition #10	11:59 pm, April 30	First Week of May
-------------------------	--------------------	-------------------

8. Application Evaluation Process

8.1 Evaluation Committee

Review of applications and recommendations for funding will be determined by the SELF Committee. All recommendations made by this committee are subject to approval by the Dean of the Schulich School of Engineering or their designate.

The SELF Committee will consist of:

- Chair (Dean or designate) - voting only to break tie
- Engineering Students' Society President - voting
- Engineering Students' Society Vice President (Internal) - voting
- Engineering Students' Society Vice President (Student Life) - voting
- Engineering Students' Society Vice President (Finance) - voting
- SELF Administrator (appointed by the Engineering Students' Society Executive Council) - non-voting

Decisions may be made via asynchronous electronic votes. Committee members may serve on the committee more than once.

Commented [AG2]: I don't think the committee follows this method of voting.

The SELF Committee will meet 8 times during the fiscal year to review applications and make recommendations for funding. Additional meetings may also be scheduled for administration and/or planning purposes.

8.2 Application Review Guidelines

Each application will be reviewed individually by multiple members of the SELF Committee, and subsequently discussed by the entire committee. The Committee will determine the funding eligibility of each application based on two parameters: the impact on Experiential Learning towards Engineering Students and overall application quality.

Stage 1: Evaluating impact on Experiential Learning towards Engineering Students

The main purpose of SELF is to enable as many Clubs and Teams as possible to pursue experiential learning opportunities that are of relevance to the Engineering students. In the first stage of the evaluation process, the Evaluation Committee considers whether a proposed activity

aligns with this purpose by evaluating the impact on experiential learning and the relevance towards the betterment of the Engineering student experience.

- Impact on Experiential Learning - The degree to which the proposed activity has the potential to have a positive impact on the Experiential Learning at the Schulich School of Engineering. This impact could be accomplished by participants seeing an improvement in current programs and activities, or through the implementation of new programs and activities within the school following the completion of the funded activity.
- Betterment of the Engineering Student Experience - The degree to which the proposed activity contributes to improving the experience of the Engineering students.

Applicants must clearly articulate the impact on experiential learning and the relevance towards the betterment of the Engineering student experience following the completion of the funded activity. If activities are deemed to have sufficient impact on experiential learning and relevance towards the betterment of the Engineering student experience, the Committee will then evaluate the overall application quality and discuss an appropriate funding level.

Stage 2: Evaluating Application Quality and Determining Funding Levels

Applications should be presented in a manner that is clear, concise and complete. The merit and impact of a proposed activity should be clearly articulated. All necessary supporting documents submitted and presented should be in a format that is easy to follow. Applications in which appropriate documentation (i.e. activity details, budget, articulated impact on experiential learning, relevance towards the betterment of the Engineering Student Experience, etc.) is missing or not clearly presented will not be rated highly. Please refer to the Appendix for the full rubric that will be used to evaluate applications.

The Evaluation Committee will allocate a funding amount for each application based on the terms outlined in this policy document. If at the end of a meeting the total allocated funding exceeds the SELF budget for that fiscal year, all outstanding funded applications will be scaled back by the same percentage. At the end of the meeting, the committee will have decided on a recommended funding amount for each application. The SELF Administrator will then provide these recommendations to the Dean or their designate for approval. The final funding decisions are at the discretion of the Dean, or their designate.

Commented [AG3]: We need to talk about this as this is not the current practice.

8.3 Appeals Process

Clubs and Teams may appeal the decisions of the Committee up to one week from when the Club/Team is notified of the application verdict through email. All appeals must be sent to the SELF Administrator. The Dean (or Designate) and ESS President will review the appeal and come to a mutual agreement. In the case of a disagreement between the Dean and the ESS president, the Dean will make the final decision on the appeal. Applicants may be asked to resubmit applications and documentation.

9. Student Responsibilities Upon Approval of Funding

9.1 Prior to the Start of a Funded Activity

Modifications to the Funded Activity

Deferring an activity: Applicants may defer the start date of an approved activity up to the end of the fiscal year they applied in. Activities that get deferred to a different fiscal year will need to be resubmitted on the next applicable funding competition, unless approved by the Chair of the Committee and the ESS President. Otherwise, the Committee will re-evaluate the activity in the next applicable funding competition.

Significant changes to an activity and/or additional activities can be approved by the Chair of the Committee and the ESS President. Applicants are required to notify the SELF Administrator in the event that the activity is cancelled or the Club/Team is no longer able to attend or host the approved activity. Funds allocated to the cancelled activity cannot be reallocated to another activity.

Risk Management

Each participant of a funded activity is responsible for adhering to all regulations of the University of Calgary and the Schulich School of Engineering including, but not limited to:

- Registering with University Risk Management
- Registration with the University of Calgary Student Union if appropriate
- Adhering to any event and risk protocol in regards to guests on campus
- Procuring Medical Insurance
- Completing any Legal Waivers and other requirements

9.2 After the Completion of a Funded Activity

Clubs/Teams will be required to submit four documents after the completion of a funded activity. Failure to submit the documents may result in the Club/Team being ineligible for future SELF funding. The four documents are as follows:

1. Reflection (Submit in PDF format)
2. Post-Activity Report (Submit in XLSX format)
3. Zip Folder containing all receipts (Please see below for instructions on receipts)
4. Invoice billed to the: 'University of Calgary Engineering Students' Society' for Reimbursement (Submit in PDF format)

Note all documents should be submitted in one folder

For group applications, only one report and one reflection is required to be submitted following the completion of the funded activity. If a group fails to complete the post-activity report and the reflection, the same activity may not be funded in future years. Additionally, the

associated Clubs/Teams and primary applicants/designates responsible for the report may not be eligible for future funding competitions.

The SELF Committee reserves the right to apply additional accountability requirements when the application is evaluated.

Reflection

Upon the completion of any SELF funded activity, the organizers of the funded activity will be required to complete a reflection on the impact on experiential learning and the relevance towards the betterment of the Engineering student experience.

What to Include in the Reflection:

1. What did you want the participants to learn from this activity? (50-100 words)
2. What did the participants learn from the activity? (50-100 words)
3. How did you try to assess whether the participants learned something or not? (50-100 words)

Additional feedback may also be included in the reflection. *Note: organizers of funded activities may be asked to attend a session relating to: "How do you plan to assess student learning at your event" run by Emily Wyatt and team.*

Post-Activity Report

Upon the completion of any SELF funded activity, funded participants will be required to complete a post-activity report to receive reimbursements. Failure to submit a post-activity report will result in disqualification from future SELF funding for the Club/Team. Clubs/Teams will also be required to submit their actual budget, along with receipts and supporting documentation.

What to Include in Post-Activity Report workbook:

1. One worksheet titled 'Projected Budget'
2. One worksheet titled 'Actual Budget' (Both budgets can be found in SELF Budget Template)
 - a. Make sure to include every receipt included in the zip folder and use the naming convention as noted below
3. Must be submitted as one XLSX workbook

Receipts

- Ensure all receipts are an easy to open file (pdf, png, or jpg).
- Rename all files to the following: application#_VendorName_CategoryLetter.pdf
 - o (Your application number will be provided to you when you are notified of your applications approval)
- Add all receipts into one folder named application#_CategoryLetter.zip and compress it

- Example: A receipt for a November funding competition for pizza in a Category A event may look like this:
202611-02_dominos_A.pdf in a folder named 202611-02_A.zip

Deadline for Post-Activity Report and Reflection

The post-activity report and reflection are due within 30 days of the activity completion date. Failure to submit the required documentation within the timeframe specified may result in the Club/Team being ineligible for future SELF funding. Funds will be distributed to the Club/Team through reimbursement upon submission of the required documentation.

9.3 Disbursement of Approved Funds to Clubs/Teams

Clubs and Teams

- Payments will be processed within 30 days of submission of the following documents:
 - Post-Activity Report
 - Reflection
 - Invoice sent to the SELF administrator, billed to the: 'University of Calgary Engineering Students' Society'
 - The invoice should be submitted to SELF alongside the Post-Activity Report.
- A cheque will be mailed to the team's billing address noted on the invoice. Clubs/Teams are responsible for keeping their billing address up-to-date. Funding distribution may be denied if proper receipts and supporting documentation is not submitted. Re-submission of documentation will be allowed at the discretion of the SELF Administrator.

10. Funding Details for Activity Category A: Mental Health Events

Funding is available for Clubs and Teams that are holding events for the engineering students focused on Mental Health

Mental Health Events Funding Policies and Guidelines

- SELF is provided to finance activities that clearly demonstrate health & wellness of the Engineering student. It must be evident from the description of the proposed activity that the purpose of the activity is to improve the Engineering student experience.
- Clubs/Teams may apply for multiple activities per fiscal year under this category, with SELF subsidizing each activity up to a predetermined maximum (specified in Table 1).
 - Clubs/Teams may apply for one activity per semester to go towards internal team bonding (ex. Pizza party). The funding regulations in section 6 must be met. The application must specify that an internal team bonding activity is happening. Internal team activities will be subsidized up to \$350 per activity.

Required Supporting Documentation

- Completion of Application I.

11. Funding Details for Activity Category B: EDI, Indigenous, & Sustainability Initiatives

Funding is available for Clubs and Teams that have Equity, Diversity, Inclusion (EDI), Indigenous, and/or Sustainability initiatives geared towards the engineering students.

EDI, Indigenous, & Sustainability Initiatives Funding Policies and Guidelines

- SELF is provided to finance activities that clearly demonstrate Equity, Diversity, Inclusion (EDI), Indigenous, and/or Sustainability initiatives. It must be evident from the description of the proposed activity that the purpose of the activity is to improve the Engineering student experience.
- Clubs/Teams may apply for multiple activities per fiscal year under this category, with SELF subsidizing each activity up to a predetermined maximum (specified in Table 1).

Required Supporting Documentation

- Completion of Application I.

12. Funding Details for Activity Category C: Learning Support

Funding is available for Clubs and Teams that want to offer learning support to the engineering students.

Learning Support Funding Policies and Guidelines

- SELF is provided to finance activities that clearly demonstrate skills improvement of the Engineering student. It must be evident from the description of the proposed activity that the purpose of the activity is to improve the Engineering student experience.
- Clubs/Teams may apply for multiple activities per fiscal year under this category, with SELF subsidizing each activity up to a predetermined maximum (specified in Table 1).

Required Supporting Documentation

- Completion of Application I.

13. Funding Details for Activity Category D: Engineering Design

Funding is available for all engineering-focused competition teams that require funds for research and testing their team designs.

Commented [DY4]: Will advise with team

Commented [DY5]: Already implied

Engineering Design Funding Policies and Guidelines

- SELF is provided to finance activities that clearly demonstrate Experiential Learning of the Engineering student. It must be evident from the description of the proposed activity that the purpose of the activity is to make an impact on experiential learning and improve the Engineering student experience.
- Any Schulich Competition Teams that are not eligible for and do not qualify for Schulich Students Activities Fund (SSAF) can apply for SELF with the following condition:
 - Signed Letter of Support from the Dean or their designate must be provided
 - Contact information of Faculty Advisor or Technical Advisor must be provided to verify the application is valid
- Schulich Competition Teams may apply for multiple activities per fiscal year under this category, with SELF subsidizing up to a predetermined maximum in total for that year (specified in Table 1).

Required Supporting Documentation

- Completion of Application II.

14. Funding Details for Activity Category E: Professional Development Projects

Funding available for Clubs and Teams that have Professional Development projects geared towards engineering students. These projects are meant to improve and expand upon the opportunities for students in pursuit of their career goals.

Professional Development Funding Policies and Guidelines

- SELF is provided to finance activities that clearly demonstrate industry learning of the Engineering student. It must be evident from the description of the proposed activity that the purpose of the activity is to improve the Engineering student experience.
- Clubs/Teams may apply for multiple activities per fiscal year under this category, with SELF subsidizing each activity up to a predetermined maximum (specified in Table 1).

Required Supporting Documentation

- Completion of Application I.

15. Funding Details for Activity Category F: Club/Team Operations

Funding available for Schulich Club and/or Team Operations that will support in their efforts to provide events/services to the engineering students.

Club/Team Operations Funding Policies and Guidelines

- SELF is provided to finance activities that clearly demonstrate Club and Teams operations management. It must be evident from the description of the proposed activity that the purpose of the activity is to improve the Engineering student experience.
- Acceptable Criteria for Club/Team Operations Funding:
 - Insurance (i.e. Medical, Travel)
 - Sanitary Equipment
 - Office Supplies
 - Training Courses
 - Room Bookings
 - AV Rental
- Additional items that do not fall under the criteria above will be assessed and approved at the discretion of the Committee.
- Clubs/Teams may apply for multiple activities per fiscal year under this category, with SELF subsidizing up to a predetermined maximum in total for that year (specified in Table 1).
 - To promote good governance, in addition to the two yearly applications, Clubs/Teams may submit one additional activity under Category F per fiscal year. This activity **must** be for an Annual General Meeting. Annual General Meetings will be subsidized up to \$350 per activity.

Required Supporting Documentation

- Completion of Application I.

16. Funding Details for Activity Category G: Other

Funding for all other activities that do not fall under the categories that are listed above.

Other Funding Policies and Guidelines

- SELF is provided to finance activities that clearly demonstrate Experiential Learning of the Engineering student. It must be evident from the description of the proposed activity that the purpose of the activity is to make an impact on experiential learning and improve the Engineering student experience.
- Includes Schulich Clubs and Teams that are looking at hosting a small-scale event for engineering students.
- Clubs/Teams need to get permission from the Dean or designate prior to applying under this category.
- Clubs/Teams may apply for multiple activities per fiscal year under this category, with SELF subsidizing each activity up to a predetermined maximum (specified in Table 1).

Required Supporting Documentation

- Completion of Application III.

17. Appendix

Table 3: SELF Application Evaluation Rubric

Criterion	Class A	Class B	Class C	Class D
	Strong	Competent	Developing	Needs Work
Impact on Experiential Learning <i>The degree to which the proposed activity has the potential to have a positive impact on the Experiential Learning at the Schulich School of Engineering.</i>				
Betterment of the Engineering Student Experience <i>The degree to which the proposed activity contributes to improving the experience of the Engineering students.</i>				
Budget <i>Thoroughness and clarity of the proposed costs of the activities and the degree to which the costs are reasonably allocated.</i>				
Required Documentation <i>All required information is submitted to support the application and follows the SELF policy.</i>				
Quality of Application <i>All application documents are well written, easy to read, and are presented in a clean and concise manner.</i>				

Rubric Breakdown

- Each of the 5 Categories are scored out of 4 for a total of 20 possible points.
 - Class A: Strong = 4/4
 - Class B: Competent = 3/4
 - Class C: Developing = 2/4
 - Class D: Needs Work = 1/4

A minimum of 15 points is required to receive funding.

- Clubs/Teams will be ranked by their total score to determine priority when distributing funds
- The 5 Categories are ranked in order of importance as follows:
 1. Betterment of the Engineering Student Experience
 2. Impact on Experiential Learning
 3. Budget
 4. Required Documentation
 5. Quality of Application

If the score between multiple Clubs/Teams are the same, then each category will be considered in ranking order, and the final decision will be made at the discretion of the Committee.

- Any Class D score: Entire application will need to be resubmitted by the Club/Team (even if the overall score met the 15 point minimum).
- Any Class C score: Only the portion of the application in question will need to be resubmitted. Issues must be addressed by the Club/Team before funding is approved (even if the overall score met the 15 point minimum).
- Any Class B score: Funding may be approved at the discretion of the Committee. Applicants may be asked to submit additional comments to support their applications before funding can be distributed.
- Any Class A score: Funding is approved. No further action is required.
